"My differences are my superpowers."

Summary

Software Test Engineer able to develop a QA process and work in fast-paced test environments to examine software at each stage of development and production. Verifies functionality, layout and operation for usability and visual design issues. Familiar with working in Agile environments.

Work Experience

RightCom
Ebene, Mauritius

SOFTWARE TEST ENGINEER
Feb. 2021 - PRESENT

- Understand the business requirements, functionality and technical implementation of RightCom products.
- Review the specification documentation and design of RightQ V2 to be implemented in order to identify QA requirements, provide feedback on QA and needs for QA efforts.
- Review requirements, specifications and technical design documents to provide timely and meaningful feedback.
- Assist QA lead/manager to define and refine functional testing approaches, tools, automation and documentation.
- Develop functional test cases and detailed functional test cases for RightQ, RightTime, RightDesk and RightSurvey.
- Perform manual testing of new features (functional, usability, user acceptance, API, responsiveness, regression on RightTime, RightDesk, RightQ and RightSurvey).
- Identify, and record bugs.
- Tracking issues and driving resolutions throughout the testing process.
- Respond to developers' questions regarding test results, bugs and defects.
- Design, develop, run and maintain automation scripts using Selenium with Python.
- Collaborate with the DevOps team to introduce automation scripts into the CI/CD pipeline with GitLab CI.

GO DIGITAL BENIN
Littoral, Cotonou, Benin

GRADUATE STUDENT INTERN
Mar. 2020 - Oct. 2020

- Develop a framework for automating user interface tests using the PHP programming language, the Behat framework for behaviour driven development (BDD) and the natural language Gherkin.
- Testing APIs (NodeJs) with Postman.
- Develop and maintain automation scripts for end-to-end testing with the cypress framework.
- Scraping data with scripts written in python on junglescout.com.
- Leading a web development course with the Wordpress CMS.
- Implement mobile application interfaces with android studio (java).

GITS
Littoral, Cotonou, Benin

STUDENT TRAINEE
Aug. 2019 - Oct. 2019

- Helping other trainees achieve their training and conditioning goals.
- Integration of github applications that subscribe to events on Github.com using webhooks into an application developed with the Django framework.
- Implementation of web interfaces with the React JS framework.

Skills

LANGUAGES	Python, JavaScript, SQL, Gherkin
FRAMEWORKS	Pytest, Selenium, Cypress, Appium, Behat
TOOLS	Git & Github, Bash, Microsoft Excel, Jira, Postman, Jenkins
TECHNICAL SKILLS	Software Testing, Black Box Testing, BDD, Test Cases, Agile Methodologies, Automation Testing
